

Agile Sourcing

**Be confident bringing on  
new partners quickly**

# Be confident bringing on new partners

Procurement and supply chain professionals understand that third-party supplier due diligence is more important than ever in today's interconnected supply chains, which frequently span across the globe. Procurement teams need Agile Sourcing, the ability to quickly evaluate the risk of new and long-time vendors, identify potential issues, and rapidly source alternatives. They also need to be able to monitor those suppliers, and the sub-tier suppliers they depend on, continuously.

The limits of conventional sourcing are clear: Businesses have long-relied on manual, survey-driven assessments for these insights, a process that takes weeks, relies on trusting vendor input, and is not scalable to assess vendor risk for 4th-, 5th-, and Nth-party suppliers. That's why, [according to Deloitte](#), only 2% of companies identify and monitor 4th and 5th parties.

Proper due diligence begins with agile sourcing, informed by continuous multi-factor risk monitoring across the entirety of your extended supply chain. [Gartner estimates](#) that an astounding 72% of all renegotiated contracts could have been prevented with better due diligence. And now you can get all the insights you need to rapidly assess and onboard suppliers with Interos.

"72% of all renegotiated deals could have been prevented with better due diligence."

— Gartner

# Evaluate Multi-tier Suppliers against Multiple Risk Factors Continuously

Only Interos gives you in-depth multi-tier, multi-factor due diligence assessment when it comes to sourcing. Our third-party risk management solution ensures confidence when bringing on third parties by surfacing the risks in the supply chains of new, unknown suppliers as well as your long-time suppliers. Get broad perspective as well as the specifics on risks that matter most to you.

With Interos, companies save time and money when sourcing, typically benefiting from a 30:1 reduction in analyst days to conduct due diligence on your suppliers down to the Nth tier. Using Interos to monitor and evaluate your extended supply chain prevents costly re-sourcing and minimizes concentration risk across the board.

Need to evaluate new suppliers thoroughly and quickly?

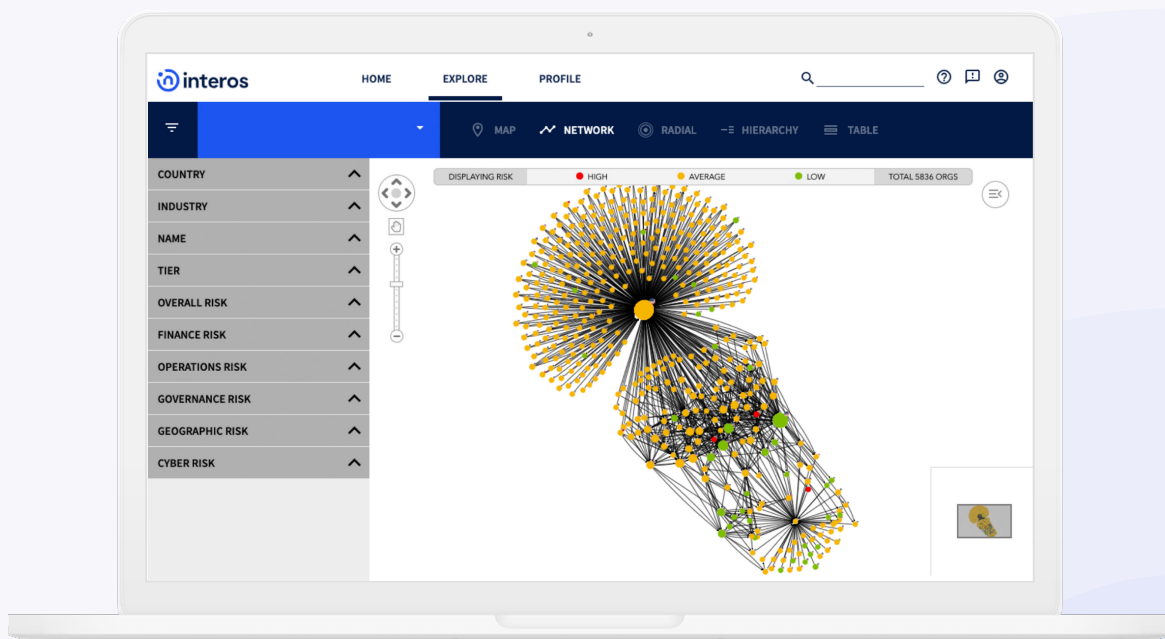

## Do so with Interos:

- Gauge the risk of new as well as long-time suppliers against financial, operational, governance, geographic, and cyber factors
- Source alternative suppliers quickly
- Ensure you are sourcing only from ethical suppliers
- Assure an uninterrupted supply of materials
- Track changes in your suppliers' risk factor scores over time

# First Multi-tier, Multi-factor, Third-party Risk Management Solution

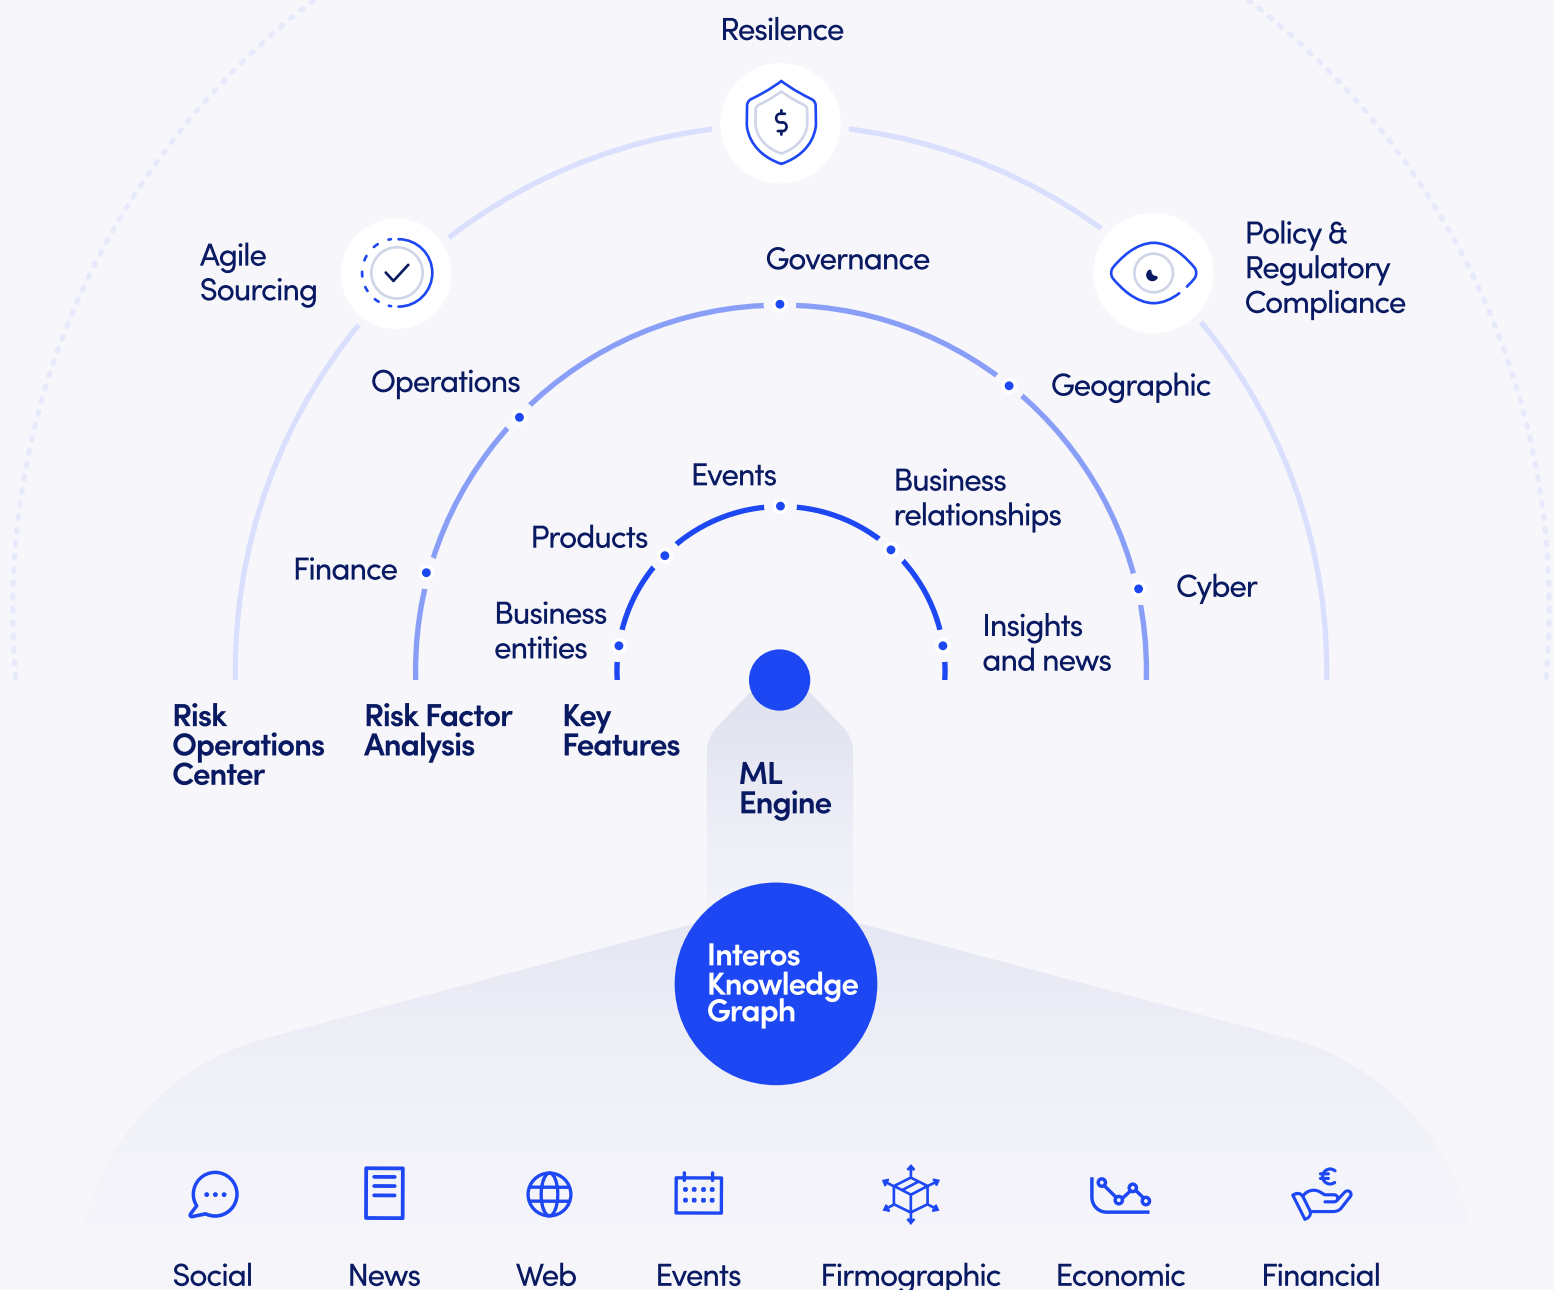

Interos is the first and only multi-tier, multi-factor, third-party risk management solution that allows you to perform deeper due diligence at scale. The solution allows you to see all the suppliers in your ecosystem down to the nth tier and identifies potential risks that could impact your business operations and brand reputation. The solution continuously monitors financial, operational, governance, geographic, and cyber risk in your extended supply chains and provides actionable insights so you can limit business interruption, avoid compliance issues, eliminate concentration risk, and prevent potential harm to your brand.

The solution includes the Interos Knowledge Graph (IKG), which is the world's largest business relationship graph repository. IKG automatically discovers suppliers and their supplier networks across the globe, maps business relationships across the entire ecosystem, and assesses each vendor against multiple risk factors. This helps procurement and supply chain professionals make strategic buying and vendor management decisions with none of the friction.

# How does Interos Work

IKG ingests 250 million events each month from more than 85,000 feeds to create a repository of over 100 million companies. We continuously monitor 2 million of these companies to identify business relationships between entities. IKG uses machine learning and natural language processing to analyze both structured and unstructured data from publicly available sources as well as from our strategic data alliances to detect entities and infer relationships. And all of this is done automatically and continuously.

# About Interos

Interos protects customers' brand and operations from risk in their extended supply chains and business relationships. The first AI-powered platform for eliminating multi-party, multi-factor risk from 3rd, 4th to nth tier parties, Interos automates discovery, detection, and response to financial, ethical, geographic, cyber and relationship risk.

Designed by experts and leveraging the company's 15 years of experience in managing the world's most complicated supply chains, Interos provides real-time risk management for the largest commercial brands in manufacturing, financial services, and aerospace and defense.
