

Interos Integrates with Service Now to Build Global Supply Chain Operational Resilience

Potential risks and threats to supply chains and business relationships are real and here to stay, COVID disruptions, SolarWinds, China tech and trade wars, Log4J, international conflicts, regulatory compliance, ESG-based ethics in component resourcing/delivery and labour are just some of risk factors impacting your organisation.

Historically insight and data-gathering has been manual and time intensive impacting efficiency, accuracy, time to action and even brand reputational.

Business leaders are frustrated at being frozen in a rozen in an outdated and often inaccurate and often an inaccurate approach to managing supply chain risk. Having people manually comb through databases and directories for months to make snapshot spreadsheets and surveys with dated, incomplete data is not the way to manage and mitigate risk.

The supply chain is the beating heart of any organisation. Employee productivity, efficiency, time to market, competitiveness, product development/innovation and customer experience can all be negatively affected by the lack of the operational resilience of the supply chain.

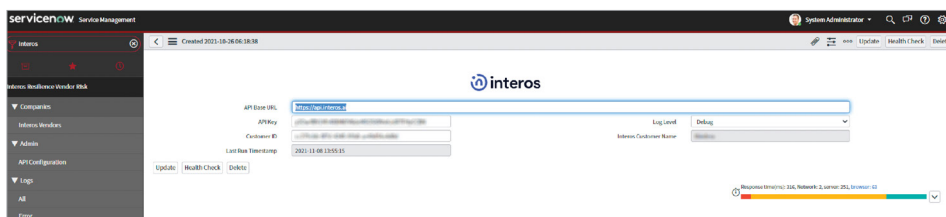

SUPPLY CHAIN RESILIENCE WITH SERVICENOW AND INTEROS

Interos integration with ServiceNow delivers comprehensive risk intelligence for confident decision making and continuous monitoring of multi-tier supplier risks and compliance within the supply chain.

Promoting better supplier decisions with broader and deeper insight into financial, operational, ESG, geopolitical, restrictions, and cyber risks from the Interos Operational Resilience Cloud.

INTEGRATION FEATURES

Interos Security Risk Vectors integrated into ServiceNow Vendor Risk Management transforms the way customers can manage vendor risk by contextualizing and connecting objective, third-party risk data to broader vendor risk workflows, driving efficiencies and business success.

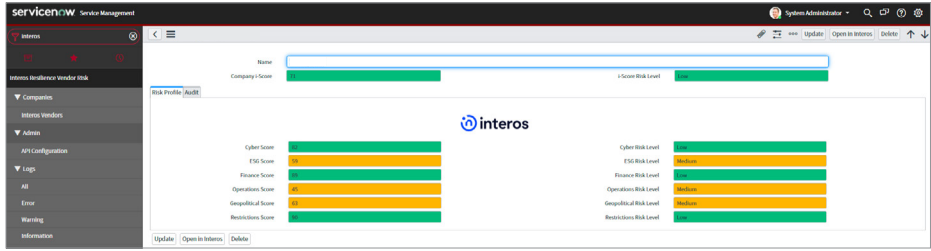

Why ServiceNow and Interos

- Centralised vendor risk management experience
- Identify sub-tier suppliers to the Nth tier
- Trigger vendor reassessments, issues, tasks, and notifications
- Reveals the overall health of supply chain, offering visibility and automated remediation
- Assess prospective, new, and existing entities against 6 risk factors:
 - finance, operations, restrictions, geopolitical, ESG, and cyber
- Rapid deployment via the ServiceNow store

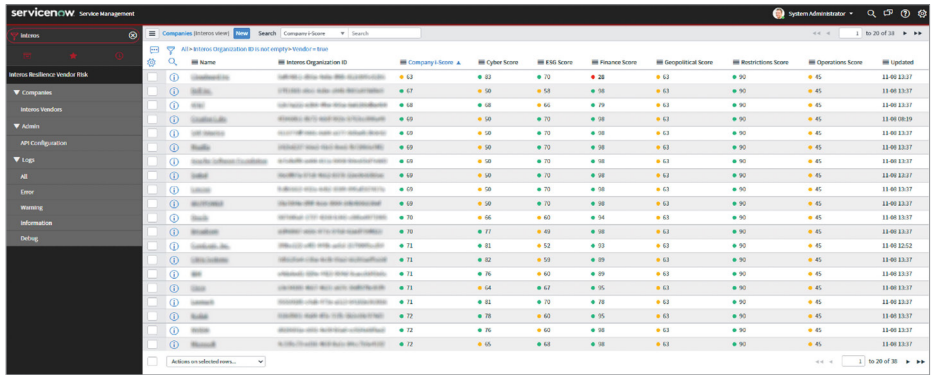

Features

- Interos i-Score risk levels in company profile, lists and reports
- i-Score updates feed into configurable ServiceNow automated workflows
- Deep links to company profile reporting within the Interos platform for multi-tier risk intelligence

Create an integrated enterprise approach to third-party risk by delivering vendor risk and portfolio vulnerability reports across operations, finance, and cyber on the ServiceNow vendor workspace. In addition offering consistent assessment and remediation with automated efficiency - all while driving transparency and accountability with third-party stakeholders.

Interos Ratings and Risk Vectors facilitate decision making during vendor onboarding and tiering, while continuous monitoring of risk rating changes drives automated workflows within the ServiceNow platform. This providing the necessary visibility to enable process adjustments, a rapid response to risk, and tighter alignment with overall enterprise risk management priorities. The result is a much needed integrated view of risk across the organization and throughout the supply chain.

Interos Ratings and Risk Vectors facilitate decision making during vendor onboarding and assessments, while continuous monitoring drives automated workflows within the ServiceNow VRM platform. Including this objective context allows you to adjust your vendor risk management program processes, creating tighter alignment with your overall enterprise risk management priorities and ultimately establish an integrated view of risk.

About Interos

Interos is the operational resilience company — reinventing how companies manage their supply chains and business relationships — through our breakthrough SaaS platform that uses artificial intelligence to model and transform the ecosystems of complex businesses into a living global map, down to any single supplier, anywhere. Reducing months of backward-looking manual spreadsheet inputs to instant visualizations and continuous monitoring, the Interos Operational Resilience Cloud helps organizations reduce risk, avoid disruptions, and achieve superior enterprise adaptability. Businesses can also uncover game-changing opportunities to radically change the way they see, learn and profit from their relationships. Based in Washington, D.C., Interos serves global clients with business-critical, independent relationships across their primary operational areas: supply chain, financial, cybersecurity, regulatory and ESG compliance, and geographical. The fast-growing private company is led by CEO Jennifer Bisceglie and supported by investors Kleiner Perkins, NightDragon, and Venrock. For more information, visit www.interos.ai.
